The Legacy of Words

B Alan Bourgeois · Opening excerpt · 1 of 2

Caleb Lawson had hit a wall.

Not just any wall—the kind that felt insurmountable, an endless stretch of blank space mocking his every attempt to scale it.

For months, he had poured himself into his historical novel, convinced it would be his defining work. He had imagined it vividly: an intricate tapestry of forgotten Texas voices, a story that would breathe new life into the past. But instead, it lay in scattered fragments, a mess of half-baked scenes and characters that refused to speak to him.

The words wouldn’t come, no matter how many hours he sat in front of his laptop, fingers poised over the keyboard, willing the inspiration to strike. Researching Texas history had seemed like the perfect way to jumpstart his creativity, but instead, he found himself drowning in dry facts and uninspiring details. Every historical account he read felt like it belonged to someone else—detached, lifeless.

He was starting to wonder if maybe he wasn’t meant to write this book. Maybe he wasn’t meant to write at all.

That thought chilled him.

Reading sample — continued

It was why he found himself at the Texas Authors Museum, an institution he had heard about but never visited. The small but well-curated space was dedicated to preserving the works of Texan writers—some legendary, most forgotten by time. He had no expectations when he stepped inside, only the desperate hope that something—anything—might reignite his passion.

The scent of old paper and polished wood filled the air as he wandered through the exhibits, waiting for a class to begin. Writer’s Block: How to Break Through—one of many workshops the museum offered, catering to both new and experienced writers. He wasn’t sure if a class could fix whatever was wrong with him, but at this point, he was willing to try.

As he roamed one of the quieter rooms, he paused to admire the relics of writers past—old typewriters, faded first editions, yellowed handwritten manuscripts under glass. He traced his fingers lightly over a display case, his mind drifting. Did they struggle too? He wondered if these writers ever stared at the page and felt utterly, painfully empty.

Then, something caught his eye.

A small, unassuming book sat beneath the glass of a featured display. The title was elegant, the cover design simple. Nothing flashy, nothing that immediately screamed legendary. But it was the name that sent a chill through his veins.
